SUBJECT - COMPUTER SCIENCE WORKSHOP-1(CSE 2141) NAME - DEEPTESH ROUT REGISTRATION NUMBER - 2341018166 SECTION - 23412G1 BRANCH - B. TECH (CSE)

1. Create an HTML page with headings and paragraphs. Apply inline styles to the h1 andh2 headings, such as changing the font color and size. Use internal styles for the h3 andh4 headings by applying styles using the id attribute, such as setting text alignment and font-weight. Additionally, link an external stylesheet to define the body background color, style the h5 heading, and set the paragraph's text color and font size using the class attribute. Ensure the external stylesheet is properly linked to the HTML page.

This is an H5 Heading styled by an external stylesheet

This is a paragraph with text color and font size set using an external stylesheet.

Imagine you are designing a webpage for a product display. You want to style the product container using the CSS box model. The product container should have a content width of 400px, padding of 20px on all sides, a border of 10px, and a margin of 15px around it. Inside this container, place an image of the product along with a brief description. Arrange three products in a row and ensure that the images and descriptions are properly aligned within each container.

7. Create a vertical menu bar that sticks to either the left or right side of the page. Additionally, make the menu bar fixed so that it remains in the same position even when the user scrolls down the page. (To add a scrollbar to the page, you can simulate longer content by adding padding at the bottom of the page using the div element.)

Welcome to My Page

This is the main content area. Scroll down to see the fixed menu bar.

8. Create a page having image with horizontal repetition, a horizontal navigation bar with hover effect and sticky position, and some style text. Image encircled with border and outline of different style, width, and color. Increase the page height for the scroll effect.

Welcome to the Styled Webpage

This is a long page to demonstrate the sticky navigation bar and scrolling effect. Keep scrolling to see the effect.

9. Add a dropdown element with multiple values. Style each dropdown entry differently, such as using different fonts, colors, sizes, etc. When the user hovers over an element, a dropdown box should appear in that area of the webpage.

Option 1 -Courier New, Green

Scrc

Option 2 - Georgia, Brown, Yellow BG

Option 3 - Verdana, Blue, Light Yellow BG

Option 4 - Arial Black, White, Red BG 10. Create a registration page that features the SDA logo centered on the page, along with form elements including text input fields, a password field, an email field, a radio button, a dropdown list, and a submit button. Additionally, apply CSS to style each form element for a better appearance.
